

## What's New in Central Management Console (CMC) 6.5

### Riverbed® Further Simplifies WAN Optimization Management

The Riverbed Central Management Console (CMS) simplifies Steelhead® appliance management and upgrades, for your entire deployment. With version 6.5, Riverbed has added a host of new features to its CMC. These features include monitoring for the Steelhead Mobile Controller (SMC) and Interceptor appliances. In addition, CMC 6.5 is at feature parity with RiOS 6.5 in terms of functionality and configuration options.

**SMC Management** – With CMC 6.5, Riverbed has added support for centrally monitoring the SMC. This includes keeping track of SMC health, as well as auto-registration for the SMC and automatic backups.

**Interceptor Management** – The Interceptor appliance can also be managed via CMC 6.5. The benefits for the Interceptor are similar to SMC and include health status monitoring as well as auto-registration and automatic backups.

**Parity with RiOS 6.5** – With this release of CMC, the configuration options for Steelhead appliances being managed include full parity with the RiOS 6.5 feature set. All the latest RiOS 6.5 features for your Steelhead deployment can be set up and configured from a single dashboard on the CMC.

**PDF exports for Reports** – The CMC can now export Steelhead health or other statistics via the PDF format for easy distribution among administrators and other stake-holders in the IT department.

### BENEFITS

- SMC and Interceptor management
- Feature parity with RiOS 6.5
- Manage up to 2000 Steelhead® appliances
- Easy export of reports in the PDF format

### About Riverbed

Riverbed delivers performance for the globally connected enterprise. With Riverbed, enterprises can successfully and intelligently implement strategic initiatives such as virtualization, consolidation, cloud computing, and disaster recovery without fear of compromising performance. By giving enterprises the platform they need to understand, optimize and consolidate their IT, Riverbed helps enterprises to build a fast, fluid and dynamic IT architecture that aligns with the business needs of the organization.
