

Course Details

Cascade™ Shark & Pilot Configuration & Operations

Course Information

Number of Days: 2 days

Instruction Method: Instructor-led

Cascade Software Version Used in Class: 2.4

This course uses Cascade Pilot Console software version 2.4 and is also effective for students using earlier versions.

Course Description

Cascade Shark & Pilot Configuration & Operations is a two-day course delivered by Riverbed technical experts. This task-oriented course imparts the knowledge and skills needed to configure and administer the Riverbed Cascade Shark and Pilot solution.

Who should take this course?

Cascade Shark & Pilot Configuration & Operations is targeted specifically for Riverbed resellers/partners and customers involved in the design, deployment, or administration/technical support of the Riverbed Cascade Shark and Pilot solution.

Prerequisites

- Network monitoring and management concepts and tools such as NetFlow, network taps, packet capture and analysis, and so forth
- Certification as an RCSA/RCSA/CCNA or the equivalent internetworking knowledge is very helpful (network design, operations, and troubleshooting)
- Participants are **required** to bring along their own laptops **AND**,
- Java is required to be installed and allowed in the browser on the student laptop

Course Objectives

Upon completion of the course, you will be able to:

- List key features and benefits of the Cascade Shark appliance and Pilot software
- Size and configure the Cascade Shark appliances for various networks
- Describe how Cascade Shark appliance captures network traffic and how the Pilot software is used
- Configure the Shark appliance packet recorder, create capture jobs and filters
- Use the Pilot Console Views, Alerts, and Reports to effectively analyze network traffic

Course Topics

- Course Overview
- Riverbed Cascade Shark & Pilot Product Overview
- Introduction to the Cascade Shark Appliance
- Cascade Pilot Overview
- Case Studies
- Introduction to Wireshark & Packet Analysis
- Course Summary
