

## Course Details

### Cascade™ Configuration & Operations

#### Course Information

**Number of Days:** 3 days

**Instruction Method:** Instructor-led

**Cascade Software Version Used in Class:** 8.4.x

This course uses Cascade software version 8.4 and is also effective for students using version 8.3.x or earlier.

#### Course Description

*Cascade Configuration & Operations* is a three-day, lab-intensive course delivered by Riverbed technical experts. This task-oriented course imparts the knowledge and skills needed to configure and administer the Riverbed Cascade solution.

#### Who should take this course?

*Cascade Configuration & Operations* is targeted specifically for Riverbed resellers/partners and customers involved in the design, deployment, or administration/technical support of the Riverbed Cascade solution.

#### Prerequisites

- Network monitoring and management concepts and tools such as NetFlow, network taps, packet capture and analysis, and so forth
- Certification as an RCSA/RCSP/CCNA or the equivalent internetworking knowledge is very helpful (network design, operations, and troubleshooting)
- *Steelhead Appliance Deployment & Management* training course is *recommended*
- Participants are **required** to bring along their own laptops **AND**,
- Java is required to be installed and allowed in the browser on the student laptop

#### Course Objectives

Upon completion of the course, you will be able to:

- List the features of the Cascade appliances
- Navigate within the Cascade Management Console (GUI)
- Configure the Cascade appliances
- Size the Cascade solution for a given network
- Create Dashboards specific to different user's needs
- Create Reports highlighting different reviewer's needs
- Perform Application Performance Monitoring
