

Business Audience

TOP 10 REASONS TO ATTEND

10. **Get more from your network.** Learn how to control operating costs by making better use of current bandwidth, avoid network upgrades, and make room for VoIP, video, and Citrix.
9. **Build a more efficient IT infrastructure.** Discover how to realize consolidation and virtualization initiatives without impacting performance for your users.
8. **Meet your Service Level Agreements.** Find out how visibility, diagnostics, and high availability enables you to continuously deliver high quality IT services.
7. **Grow your scale, not your costs.** See how you can easily scale your approach to meet the need of any site; from single users to your biggest enterprise data centers.
6. **Find the right partner for your business.** Meet the industry's best technology vendors; from value add resellers to systems integrators to managed service providers.
5. **Win friends and influence people.** Network with your peers and colleagues from around the world for valuable insight and new relationships.
4. **Increase productivity of your company.** Accelerate mission-critical applications (and all other applications) to increase efficiency of your end users and IT staff.
3. **Adopt public cloud.** Sort hype from high potential to find where and when public cloud computing fits your business needs, and how to get there from here.
2. **Enhance your disaster recovery capabilities.** Protect more of your enterprise data, more often, less expensively, more reliably, and recover faster too.
1. **Gain clarity on the industry.** Hear from outstanding experts and visionaries on best practices, what's what today, and what the new day will bring.
