

Fix What Others Can't See

Give Digital Workplace Teams the Full 360° View of Employee Experience

Digital Experience Isn't Just About "Is It Working?" but "Is It Working for Employees?"

Digital Workplace teams often fly blind. You:

Lack end-to-end visibility into user experience—across all apps, networks, and devices.

Don't know which apps are being successfully adopted or ignored.

Can't prove how digital friction is impacting productivity or morale.

Have difficulty connecting experience to business outcomes.

Lack visibility into your users' real digital journeys.

The Aternity 360° Difference Go Beyond Basic DEX. Welcome to True Experience Intelligence.

Riverbed Aternity unifies Digital Experience Monitoring (DEM) and Digital Employee Experience (DEX) into a single **solution**.
With 360° visibility across devices, apps, workflows, and sentiment.

Prioritize the changes that drive measurable improvement

Riverbed Aternity
