
SteelCentral Flow Gateway

Collect, aggregate, and compress flow data from across the enterprise network

The Business Challenge

Accurate data collection is a must if you want to truly understand your network. Not just a sampled subset, but complete data about peak usage, packet loss, and quality of service (QoS) is the most powerful way to get real-time visibility and historical insight that can help you optimize delivery of your network services. Yet in today's complex network environment, it can be difficult to quickly collect data from different devices and quickly gain an end-to-end network view without having to install probes everywhere.

The Riverbed Solution

Riverbed® SteelCentral™ Flow Gateway collects and forwards flow data (NetFlow, sFlow, J-Flow, IPFIX and other popular flow statistics) from network devices and SteelFlow Net from SteelCentral AppResponse packet-capture appliances. It de-duplicates common information, and then forwards it to the SteelCentral™ NetProfiler console for network troubleshooting, just-in-time alerting, and reporting.

SteelCentral Flow Gateway Virtual Edition runs on VMware vSphere to provide added deployment flexibility.

Key Benefits

Highly scalable, easy-to-use flow collection for cost-effective, end-to-end insight into traffic and bandwidth usage.

Key Features

Track 100% of all flow traffic on the network

Collects popular metrics from NetFlow (V1, V5, V7 and V9), IPFIX, Enhanced NetFlow, NBAR, sFlow V2 and V5, J-Flow, cFlow, Packeteer FDR, Citrix AppFlow, Palo Alto Networks, Cisco NBAR2, Cisco MediaNet, Cisco ASA NSEL and SteelFlow Net.

Deduplication

SteelCentral Flow Gateway appliances remove flow data redundancy through deduplication and centralizing the storage of flow data. Flow Gateway de-duplicates flows for end-to-end flow visibility, better accuracy in reporting, and lower total cost of ownership.

Reliable, compressed transmission

Flow data is critical when every transaction counts but it shouldn't clog the network in order for you to analyze it. Flow Gateway aggregates the data, de-duplicates it, compresses it by five to ten times, encrypts it, and then transmits it via TCP to NetProfiler for enhanced reliability to NetProfiler reliability and reduced impact on the network.

Data granularity

All organizations can benefit from continuous flow data analysis, especially those in financial services, trading, government, healthcare, and retail. SteelCentral Flow Gateway supports 2 million flows per minute (FPM) at up to one minute data granularity so nothing is missed.

Resiliency

When connectivity is lost, Flow Gateway will temporarily store flows until connectivity is restored and flows can be delivered.

Product Models

SteelCentral Flow Gateway Appliance supports from 150,000 to 40 million raw flows per minute.

SteelCentral Flow Gateway Appliances

Product SKU	SCFG-02280 Series
Deduplicated Flow Capacity (FPM)	100,000 to 6 million
Raw Flow Capacity (FPM)	40 million
Raw Flow Capacity with Advanced Security Module (FPM)	20 million

SteelCentral Flow Gateway Virtual Edition supports from 150,000 to 40 million raw flows per minute.

SteelCentral Flow Gateway Virtual Edition

Models	SCFG-VE Series											
Configuration	F1	F2	F3	F4	F5	F6	F7	F8	F9	F10	F11	F12
Flow Capacity	15,000	30,000	60,000	90,000	200,000	400,000	600,000	800,000	1 million	2 million	3 million	4 million
Raw Flow Capacity	150,000	300,000	600,000	900,000	2,000,000	4,000,000	6,000,000	8,000,000	10 million	20 million	30 million	40 million
Hypervisor	VMWare ESXi 6.0, 6.5 and 6.7

About Riverbed

Riverbed®, The Digital Performance Company™, is united in our purpose of *Advancing the Human Experience in the Digital World*. Behind every digital experience is a human one, and Riverbed enables organizations to measure digital experiences and maximize digital performance so they can deliver better and more powerful human experiences—for customers, employees, partners, patients, and citizens. Riverbed's Digital Performance Platform includes a combination of Digital Experience Management and Next-Generation Infrastructure solutions that ensure superior digital and user experiences, provides new levels of operational agility and accelerates business outcomes. Riverbed's 30,000+ customers include 100% of the *Forbes* Global 100. Learn more at riverbed.com.
