

# BRANCH DISASTER RECOVERY

What is the **IMPACT** to your business?

"If an incident or disaster takes out an office, it's bad. There are financial – and reputational – impacts for us and for our customers."

Mike Rinken, IT Director, Mazzetti  
(Leading mechanical engineering firm)

## Traditional Recovery

Days to Recover. Data Loss. Huge Costs.

Order new servers

Retrieve tapes from storage

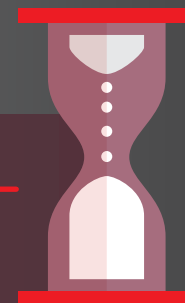

Travel to site

Restore hardware, software and data

24+  
HOURS

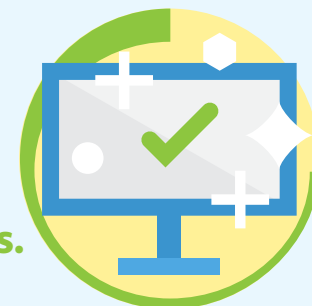

## Instant Recovery

15  
MINUTES

Riverbed® SteelFusion™  
Branch Converged Infrastructure

Recover in Minutes. Near-zero Data Loss. Lower Costs.

>50%

A majority of organizations report **over 50%** of data is stored in branch offices.  
(Forrester, October 2011)

55

Every datacenter serves, on average, **55 branches**  
(IDC, June 2013)

SteelFusion™ helps customers achieve a **96x** reduction in branch recovery time and a **30x** reduction in branch provisioning time.

(Convergence for the Branch Office: Transforming Resiliency and TCO with Riverbed SteelFusion, Taneja Group Technology Validation, April, 2014)

"Branch data is delivered encrypted from the datacenter at local speed, no matter the distance or location, and enables the restore of operations in a matter of minutes versus days."

Searl Tate, Director of Engineering, Paul Hastings  
(Leading international law firm)
