
SteelCentral Aternity SaaS Admin Self-Paced Training

This one-day self-paced course helps Riverbed customers and partners to rapidly become effective administrators of SteelCentral Aternity deployed as SaaS.

It includes a technical introduction to Aternity, familiarization with core user interface and usage

concepts, a detailed coverage of relevant deployment, setup, administration and maintenance operations, and a high-level introduction to custom activities.

This course is intended for enterprise IT core teams who will be administering SteelCentral Aternity deployed as SaaS. Typical participants would include the designated Aternity administrators and subject matter experts, as well as other engineers performing occasional administrative tasks on the system.

Course Topics

Aternity Primer

Understand basic platform value, concepts and usage

Platform Intro and Deployment for Admins

Understand basic platform concepts and components, screens and usage, and the Agent deployment process.

Setup Foundations

Perform core setup steps such as license provisioning and location mapping.

Administration Foundations

Perform common administration tasks such as user management, managed applications configuration, and REST API integrations.

Maintenance Foundations

Understand common Agent troubleshooting approaches, screens, and logs.

Monitors Development Primer

Understand the basic activity customization process and use the relevant tools to create a simple custom activity.

Course Availability

Self-Paced Training

10 Training Credits

Self-paced training is available to any Riverbed customer or partner and combines rich and interactive content, along with hands-on labs, delivered directly to your web browser and conducted at your own pace. Each class is priced per student attendee. For larger classes of eight or more students, we recommend on-site training.
