

20 Ways Aternity Delivers More Value

Full context.
Faster answers.
Fewer disruptions.

Work doesn't always fail loudly.

It stops when Salesforce won't load. Teams calls drop. Login times spike on Monday morning. And when that happens, Service Desk and EUC teams can fix a device issue but lack visibility into what's happening with the network and applications.

Riverbed Aternity connects user experience to root cause across devices, applications, and networks.

Here's How Aternity Uniquely Delivers Value across the Digital Experience:

- 1 Complete DEX Consolidation**
Endpoint, application, and network observability in one platform, one SKU. *Only Aternity delivers this.*
- 2 Native Insight across Applications, Devices, and Networks**
End-to-end visibility without stitching tools together. *Only Aternity delivers this.*
- 3 Built-in Session Replay**
Reconstruct the exact employee experience. *Unique to Aternity.*
- 4 A Single Common Agent that Eliminates Agent Sprawl**
One agent replaces many. *Not available elsewhere.*
- 5 The Most Complete Mobile DEX for Frontline Workers**
Full visibility across rugged, mobile, and shared devices. *No other DEX can do this.*
- 6 True Click-to-render Visibility across Every Application Type**
Measure what users actually experience. *Unique to Aternity.*
- 7 Real-time UC Resolution with Built-in Prevention**
Fix issues as they happen and stop them from recurring. *Only Aternity delivers this.*
- 8 One-second Visibility across the Entire Digital Experience**
High-frequency analytics capture device, network, and application performance at 1 second intervals. *Not available elsewhere.*
- 9 Security Built to the Most Stringent Federal Standards**
FedRAMP High and DISA IL5 certifications extend to all customers. *Not available elsewhere.*
- 10 Deepest Intel-level Device Insights**
Hardware intelligence others simply can't access. *Only Aternity delivers this.*
- 11 Proven AI Automations at Enterprise Scale**
Automation that works beyond small environments. *Not available elsewhere.*
- 12 AI-driven Workflow Creation**
Turn insight into action automatically. *Unique to Aternity.*
- 13 The Broadest Visibility into AI Costs**
Understand where AI is being adopted and how it impacts spending. *No other DEX can do this.*
- 14 Full Visibility into AI Agent Operations**
Observe how AI agents behave, interact, and impact digital experience in real time. *Unique to Aternity.*
- 15 Deepest Network Visibility, from Packets to Root Cause**
Capture real packet data, map paths, and expose dependencies with precision, not inference. *No other DEX can do this.*
- 16 Restored Network Visibility in Zero Trust Environments**
Maintain deep network insight even as traffic becomes encrypted and segmented. *Only Aternity delivers this.*
- 17 Native Device Polling for Deeper Endpoint Context**
Extend visibility beyond standard telemetry. *No other DEX can do this.*
- 18 Open Integration with Your Existing Investments**
Connect 50+ pre-built integrations into IQ workflows so issues are diagnosed with full context, not siloed data. *Not available elsewhere.*
- 19 Built-in, Purpose Built Data Structure**
Telemetry is structured and correlated at ingestion—not stitched together later. *Unique to Riverbed.*
- 20 Native, End-to-end OpenTelemetry Support**
Use your data how and where you want. *Only Aternity delivers this level of openness.*

Aternity 360° brings together endpoint experience, application performance, and network observability, giving DEX teams the context they need to diagnose faster, act sooner, and eliminate disruption.

When experience, application, and network come together like this, everything else starts to feel incomplete.
