Stop Mobile Issues Before They Impact Your Business

Every second counts in today's **mobile-driven workplace**. Yet, **performance issues waste up to 11 hours per employee per month**—the equivalent of a **lost workday**.

IT Teams Struggle With:

Frequent App Crashes Disrupt Workflows
50% of mobile workers face weekly app crashes causing delays, frustration and lost productivity.

Poor Connectivity Slows Productivity
70% of IT leaders cite mobile connectivity issues, leading to dropped calls, laggy apps, and slow cloud access.

Battery Failures Cause Downtime
40% of employees deal with battery issues, causing frequent recharges, sudden shutdowns, and rising IT support tickets.

Visibility Gaps Trigger Reactive Fixes
60% of IT teams lack real-time mobile insights, resulting in delayed responses and frustrated users.

The Business Impact

Revenue Takes a Hit
Unplanned mobile downtime costs businesses **$5,600 per min**, directly impacting revenue and customer service.

Productivity Slows
Each employee loses **32 mins daily** to mobile issues, draining efficiency and engagement across the workforce.

IT Costs Skyrocket
Mobile-related support tickets are up **35% in two years** overloading IT teams, and increasing resolution delays.

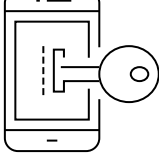

What If IT Teams Could Detect and Fix Mobile Issues Before They Impact Users?

Aternity Mobile Experience **delivers real-time visibility, AI-driven automation, and proactive remediation** — ensuring your workforce stays connected, productive, and efficient.

### How Does Aternity Help IT Overcome Challenges?

Stop App Crashes
Tracks metrics like CPU load, memory use, and error logs to detect instability, diagnoses crash causes, and leverages advanced analytics to prevent failures impacting user experience.
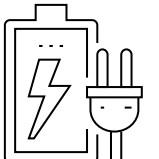

Fix Connectivity Fast
Monitors latency, jitter, and packet loss across VPN, LTE, and Wi-Fi, enabling IT teams to proactively fix ISP, wireless, and mobile network issues instantly.
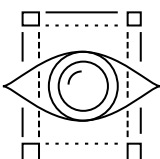

Prevent Battery Failures
Detects power-draining apps like video streaming, location services, and background processes, monitors battery health for failures, and recommends adaptive settings to extend battery life.

Gain Full Visibility
Tracks 150+ mobile performance metrics and uses AI-powered alerts to detect slowdowns early, helping IT quickly pinpoint device, application, or network issues.

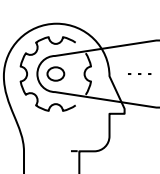

Aternity Mobile Solutions
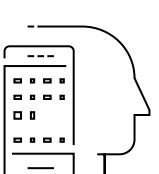

Real-Time Performance Monitoring

Aternity Mobile **delivers deep visibility into mobile devices, apps, and networks,** allowing IT to **detect and resolve performance bottlenecks** before they impact employees.

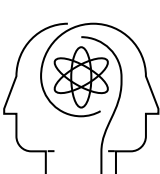

AI-Powered Issue Resolution

How It Works

Fixes issues before users notice them by predicting crashes and performance slowdowns

Automatically restarts frozen apps and optimizes network connections to keep devices running smoothly

Reduces IT workload by identifying problems early and resolving them instantly

---

Take Action Now

Eliminate mobile performance blind spots with AI-powered monitoring

Reduce IT support tickets and resolve issues before employees notice them

Maximize workforce efficiency with real-time device, app, and network insights

Minimize mobile disruptions that impact productivity, profits, and IT resources

---
