

Please refer to the table below for the available Training offerings. Click on the link in the Offering Name to learn more about each course. The number in the “Public” column is the number of GCS Credits required per student for the public instructor-led courses, while the number in the “Dedicated” column is the number of GCS Credits required for the dedicated instructor-led training consumption option. Dedicated training is recommended for onsite instruction of 8-14 students. Note that Travel & Expense (T&E) is not included in individual offerings and must be consumed separately when required. Note that self-paced training is now free to all partners and customers with an active maintenance contract. More information is available at the Riverbed Education Portal, <https://education.riverbed.com>.

Offering Name	Offering Description	Public	Dedicated
<a href="#">RCPE-P-AGGV: RCPE Professional Aggregate Visibility</a>	This two-day RCPE professional level course is focused on creating dashboards and meeting the combined visibility needs for flow, packet, application performance, and EUE monitoring.	20	144
<a href="#">RCPE-P-ENET: RCPE Professional SD-WAN Enhanced Network Configuration</a>	This four-day RCPE professional level course covers end-to-end digital performance through network configuration solutions for the branch and datacenter. This course teaches IT professionals how to meet enterprise business needs through SD-WAN solutions and how to configure the appliances and software that make it all happen.	40	288
<a href="#">RCPE-P-EOPT: RCPE Professional Enterprise WAN Optimization</a>	This five-day RCPE professional level course expands on the principles of WAN optimization technology that accelerate delivery of applications over the hybrid WAN for the large scale, complex IT enterprise. The primary objective of the RCPE Professional Level course in Enterprise WAN Optimization is to teach IT professionals how to increase application performance in large scale, consolidated environments.	50	360
<a href="#">RCPE-P-IOPT: RCPE Professional Implement WAN Optimization</a>	This five-day RCPE professional level course introduces WAN optimization technology to accelerate delivery of applications over the hybrid WAN for the modern IT enterprise. The primary objective of the RCPE Professional Level course in WAN Optimization is to teach IT professionals how to increase the performance of applications to enhance the user experience and therefore increase productivity.	50	360
<a href="#">RCPE-P-NPO: RCPE Professional NetProfiler Operator</a>	This three-day professional level course covers the concepts and use cases focusing on network and infrastructure monitoring, triage, and troubleshooting using flow visibility solutions.	30	216
<a href="#">RCPE-P-NPA: RCPE Professional NetProfiler Administrator</a>	This two-day professional level course covers the design, installation and system configuration of a NetProfiler deployment, including initial sizing and scaling, connectivity, user administration and maintenance.	20	144

Offering Name	Offering Description	Public	Dedicated
RCPE-P-NPCM: RCPE Professional Network Planning & Configuration Management	This four-day professional level course enables you to effectively optimize network monitoring and performance, audit and report on your networks, and leverage simulation tools to assess future performance and modifications in a virtual environment.	40	288
RCPE-P-AR11: RCPE Professional: AppResponse 11 Operations & Administration	This three-day professional level course enables you to execute on core concepts critical to understanding performance problems and bottlenecks in modern multi-tier networked applications.	30	216
RCPE-P-PA+: RCPE Professional: Packet Analyzer Plus (PA+)	This one-day professional level course enables you to know how to use Packet Analyzer Plus to quickly identify network and application issues using an extensive collection of analysis views.	10	72
Offering Name	Offering Description	GCS Credits	
RCPE Lab Platform-as-a-Service (PaaS)	Access to the Riverbed Lab PaaS environment for one user for up to 30 continuous days. Riverbed recommends 12 contiguous 30-day periods.	10	
Travel and Expense Per Day	One Day of Travel and Expense. Minimum quantity of five (5) days required for onsite work unless otherwise specified.	5
