

Acceleration Solutions Portfolio

Accelerating applications and services across the digital enterprise – fast, agile and secure app delivery to anyone, anywhere.

Network Challenges of Today’s Distributed Enterprise

Many companies are challenged by today’s modern hybrid workplace and workstyles. Networks are increasingly complex having migrated from on-prem, MPLS solutions to supporting mobility and internet-based applications and now leveraging remote, mobile, on-prem and edge capabilities with Cloud/SaaS, Internet, MPLS, and SASE. In addition, employees, partners, and customers expect “always on” 24/7 digital support. They need accessible, secure, encrypted, and high-performing applications.

If these challenges are not successfully met, business continuity, customer satisfaction, employee productivity and engagement, and the successful execution of business-critical initiatives are

impacted. Ultimately, how well companies support today’s network and application performance impacts the bottom line.

Riverbed Acceleration Solutions

Riverbed Acceleration solutions provide fast, agile, secure acceleration of any app over any network to users, whether mobile, remote, or in the office. Built on decades of WAN optimization leadership and innovation, our industry-leading Acceleration portfolio powers cloud, SaaS, client, and eCDN (video streaming) applications at peak speeds, overcoming network speed bumps such as latency, congestion, and suboptimal last-mile conditions to empower the hybrid workforce.

The Riverbed Acceleration portfolio is a holistic solution for accelerating any application or service across the entire distributed enterprise, to users anywhere.

The Acceleration portfolio combines the agility, performance, and security of carrier-grade SD-WAN with innovative acceleration for Cloud, SaaS, and prem-based applications and services. With client acceleration straight to the desktops of mobile and

remote workers, WANOP for traditional apps and eCDN acceleration for deploying video at enterprise scale, Riverbed ensures peak performance for every digital experience.

End-to-End Acceleration Portfolio

WAN Optimization – Riverbed’s SteelHead is the #1 hybrid network optimization and application performance solution chosen by over 30,000 organizations worldwide.

- Up to **33X faster application performance** & up to **99% data reduction**

The performance of networks and applications directly impacts business productivity. Riverbed draws from two decades of experience in driving network and application performance over Wide Area Networks with its flagship offering, SteelHead. SteelHead delivers the underlying technology that helps enterprises of all sizes maximize the efficiency and performance of the networks and applications used to run modern business.

Maximize network performance and mitigate latency

Data Streamlining

Maximize network efficiency

Application Streamlining

Maximize application performance and user experience

Transport Streamlining

Maximize network performance and mitigate latency

Elastic Performance

Optimize any network, accelerate any app, for users anywhere

SteelHead solutions are built upon 4 core principles.

Cloud Accelerator – Fast, agile, secure delivery of any cloud workload to anyone, anywhere

- Up to **50x faster migrations** & **99% data reduction**

Riverbed Cloud Accelerator is an Infrastructure-as-a-Service (IaaS) environment that accelerates migration and enhances access and reliability for any workload. Cloud Accelerator runs on leading IaaS platforms such as Microsoft Azure, AWS and Oracle Cloud Infrastructure to accelerate migration and access to workloads through proven data, transport and application streamlining, ultimately increasing time to market, enhancing employee productivity, and delivering maximum cloud value to the business.

Cloud Accelerator enables fast, agile, and secure delivery of any cloud workload to anyone, anywhere.

SaaS Accelerator – Fast, agile, secure delivery of mission-critical SaaS applications

- Up to **10x faster SaaS apps** & **99% data reduction**

Riverbed delivers the only cloud-based Software-as-a-Service (SaaS) acceleration service, purpose-built for today's dynamic workforce to ensure consistent performance of leading SaaS applications (Microsoft 365, Salesforce, ServiceNow, and more) for anyone, anywhere, regardless of distance. The solution accelerates SaaS application performance by overcoming network inhibitors such as latency, congestion, and unpredictable user-experiences.

SaaS Accelerator offers acceleration for leading SaaS enterprise applications.

Client Accelerator – Fast, secure apps and data for today’s hybrid workforce

- Up to **10x faster delivery to desktops** & **99% data reduction**

Client Accelerator extends best-in-class WAN optimization and app acceleration technology to remote users working from anywhere, providing fast and secure access to on-prem, IaaS, and SaaS-based apps across any network. The solution also interacts directly with any SteelHead, Cloud Accelerator, or SaaS Accelerator solution to optimize and accelerate on-premises or SaaS applications. The solution offers a flexible, scalable management tool that streamlines provisioning of large-scale mobile deployments. The Client Accelerator Controller helps IT teams manage client licenses and controls the deployment, management, and reporting of software clients.

Client Accelerator delivers leading-edge app performance to today’s work-from-anywhere workforce.

eCDN Accelerator – Cloud-based content delivery platform for today’s dynamic workforce

- Up to **70% faster video access** & **99% data reduction**

Video consumption for remote and in-office knowledge workers has become more critical than ever. But delivering seamless video to a dynamic, hybrid workforce has grown more challenging due to network conditions that are often outside IT’s control. Riverbed eCDN Accelerator empowers your hybrid workforce by delivering high-quality live and on-demand video to all employees, regardless of their location, device, or bandwidth capacity. In addition, our browser-based, self-service solution does not require any software to install, purchase of hardware, or investment in additional network infrastructure.

eCDN Accelerator enhances video delivery for distributed enterprises.

Software-Defined WAN – Achieve ultimate agility, performance and security as you expand your network to the internet, cloud and edge

- Overcome latency, congestion, poor link quality to **accelerate app performance by up to 33x** or more for users in the office, at home or on the go

Conventional routers can’t keep pace in the cloud era. Riverbed’s secure enterprise SD-WAN unifies connectivity across branch, data center, and multi-cloud infrastructure. The solution enables your organization to:

- **Expand connectivity options:** Increase WAN capacity with cost-effective Internet Broadband and LTE to augment or replace MPLS
- **Boost operational agility:** Streamline network operations and drive strategic value with centralized policy-based management
- **Streamline branch infrastructure:** Replace conventional branch routers with a platform that combines routing, SD-WAN, WAN optimization and security
- **Accelerate site provisioning:** Slash costs of onboarding a branch with zero-touch provisioning

Use Cases and Business Benefits

Hybrid Work Productivity

Accelerate application performance for employees working remotely. An environmental resource management company **reduced file sharing traffic by 50%** and **improved productivity by the equivalent of 17 employees per year**.

Business Continuity

Improve security and reduce costs through data center consolidation. A global insurance broker leveraged Riverbed Acceleration and failover capabilities to consolidate data centers and centralize over 200 applications, **saving \$30M/year**.

Business App Performance

Reduce the time required for business-critical transactions. A leading automotive retailer cut in-store wait time and improved on-line digital experience by **reducing Oracle transaction times by >50%**.

Employee Experience

Improve application performance across low-bandwidth networks. A shallow water oil drilling company improved productivity across low bandwidth satellite links by **speeding up application performance by >80%**.

“Our 8500 people collaborate on 3D apps, moving massive digital files across continents as if they’re working side-by-side. Riverbed Acceleration makes it possible.”

Elizabeth Harp, CIO, GHD

About Riverbed

Riverbed is the only company with the collective richness of telemetry from network to app to end user, that illuminates and then accelerates every interaction, so organizations can deliver a seamless digital experience and drive enterprise performance. Riverbed offers two industry-leading portfolios: Alluvio by Riverbed, a differentiated Unified Observability portfolio that unifies data, insights, and actions across IT, so customers can deliver seamless, secure digital experiences; and Riverbed Acceleration, providing fast, agile, secure acceleration of any app, over any network, to users anywhere. Together with our thousands of partners, and market-leading customers globally – including 95% of the FORTUNE 100 –, we empower every click, every digital experience. Riverbed. Empower the Experience. Learn more at riverbed.com.
